

Your assurance for good quality

Follow the instructions for a proper installation:

Material:

- First check if the material is in tact and not damaged in transit, in which case you are requested to contact us immediately by phone or mail at the number mentioned in the address at the bottom
- Always start using the highest roll number
- Cut the lengths + 5 cms. for the extra at ceiling and skirting board
- Check the material after cutting 3 lengths on consistency of colour and surface and contact us by phone or by mail at the number mentioned in the address at the bottom in case deviations are noticed. We do not accept liability for claims in excess of 3 lengths

Walls and/or boards:

- Make sure the walls and/or boards are smooth, solid, dry and free of mould or algae
- Remove all old wallpaper, paint or whitewash and especially traces of inks or crayon

Hanging:

- Use Duracoll BK10 or another suitable PVA dispersion adhesive
- Use Duracoll BK15 or any other diluted adhesive as a primer on porous and absorbing surfaces
- Mark a perpendicular line so that the first length can be hung at 2 cms. through the corner
- Apply sufficient adhesive with a lambs wool roller or block-brush at one length area at a time
- Use a spatula to smooth out the length in vertical direction
- Butt join or overlap the lengths by 5 cms.
- Cut the centre of the overlap with a sharp knife
- Do not cut in the underground for otherwise the joints might stand open
- Remove the outer and inner edges and re-paste the wall under the joint with a brush
- Close the joint with a spatula in vertical direction and remove glue with clean water
- Remove the strip at the ceiling and skirting-board with a spatula and Stanley knife
Always move the spatula while keeping the knife in the cut.

Stripping and removal:

- Any part of the paper substrate can easily be removed by soaking it with warm water mixed with a mild household detergent with a wall covering stripping knife.
